

RS Incident Command

Training Applications

RS Incident Command allows incident commanders to experience emergency situations and practice response strategies. It prepares trainees to make the right decisions in the heat of the moment.

The system caters to the specific needs of different industries and includes libraries of 3D environments and objects. Training can be conducted in various configurations depending on training goals.

Suitable for training:

- Emergency Response
- Communications
- Advanced Firefighting
- Search and Rescue
- Crowd Management
- Hostile Takeovers
- **And more...**

Configurations

One-on-one

One instructor trains an individual trainee in preparation for a specific role.

Classroom

One trainee leads while others assist and discuss which decisions need to be taken.

Multi-user

One instructor and multiple trainees interact simultaneously in a scenario.
